SUMMARY

Aspiring cybersecurity professional with hands-on experience in security monitoring tools and network analysis. Looking for an entry-level role where I can apply my technical knowledge to identify and mitigate security threats. Eager to grow my skills in threat detection, incident response, and vulnerability management.

TECHNICAL SKILLS

Programming: Java

Operating Systems: Windows, Linux

Tools: Wireshark, Splunk, BurpSuite, Nmap, Wazuh, Windows Event Viewer

EXPERIENCE

Full Stack Developer Intern

June 2024 – Dec 2024

Demy Software Solutions

Visakhapatnam

Developed and maintained dynamic full-stack web applications integrating frontend and backend systems.

Built optimized REST APIs and improved API response time by approximately 25%.

Integrated relational databases and implemented efficient CRUD operations.

Collaborated in designing scalable application architecture and deployment workflows.

PROJECTS

SOC Detection Lab – RAT & Suspicious Traffic Monitoring

2026

Wazuh, Suricata, Sysmon, Wireshark, VirtualBox, Windows Server, Ubuntu, Kali Linux

Built a virtual Security Operations Center (SOC) lab using VirtualBox with Windows Server, Ubuntu, and Kali Linux machines.

Configured Wazuh SIEM to collect and analyze endpoint security logs from Windows.

Deployed Sysmon to capture detailed system events including process creation, network connections, and file activity.

Implemented Suricata IDS for network intrusion detection and traffic monitoring.

Used Wireshark to capture and analyze network packets to identify suspicious activity.

Simulated RAT-like traffic and malicious network behavior from Kali Linux to test detection capabilities.

Investigated alerts and logs in the Wazuh dashboard to identify potential security incidents.

Practiced SOC Level 1 analyst tasks including log analysis, threat detection, and incident investigation.

Security Event Monitoring & Log Analysis Lab

2026

Splunk (Basics), Wireshark, Windows Event Viewer, Kali Linux

Monitored and analyzed security logs in a simulated SOC environment to detect suspicious activities such as failed login attempts, port scans, and unusual network traffic.

Performed alert triage and basic incident analysis.

Performed network monitoring to identify potential threats like port scanning and brute-force attempts.

Analyzed packet captures and correlated events to understand attack patterns and generate incident reports.

EDUCATION

Nadimpalli Satyanarayana Raju Institute of Technology

Visakhapatnam

B.Tech in Computer Science and Engineering, CGPA: 7.07

2021 – 2025

CERTIFICATIONS

Ethical Hacker – Cisco Networking Academy

Java Programming – Datapro
