SUMMARY

Aspiring AI/ML Engineer with strong hands-on experience in Machine Learning, Natural Language Processing, statistics, and data analysis. Skilled in building end-to-end ML pipelines including data preprocessing, feature engineering, model validation, cross-validation, and hyperparameter tuning. Experienced in developing and deploying scalable AI applications using Python, Scikit-learn, Docker, REST APIs, and cloud platforms. Familiar with Generative AI technologies including LLMs, LangChain, and Retrieval-Augmented Generation (RAG) for building intelligent applications.

TECHNICAL SKILLS

Programming: Python, SQL

Machine Learning: Supervised Learning, Unsupervised Learning, Regression, Classification, Feature Engineering, Model Evaluation, Cross-Validation, Hyperparameter Tuning, Scikit-learn

Statistics & Mathematics: Probability, Hypothesis Testing, Statistical Analysis, Data Distributions

Natural Language Processing: TF-IDF, Logistic Regression, NLTK, Hugging Face Transformers

Generative AI & LLMs: LangChain, OpenAI API, Ollama, Retrieval-Augmented Generation (RAG), Prompt Engineering, LLM Applications

MLOps & Deployment: Docker, REST APIs, Flask, FastAPI, Streamlit

Data Analysis & Visualization: Pandas, NumPy, Exploratory Data Analysis (EDA), Matplotlib, Seaborn, Power BI

Databases & Tools: MySQL, Git, Jupyter Notebook, VS Code, Google Colab

EXPERIENCE

Full Stack Developer Intern

Demy Software Solutions

June 2024 – Dec 2024

Visakhapatnam

Developed and maintained dynamic full-stack web applications integrating frontend and backend systems.

Built optimized REST APIs improving API response time by approximately 25%.

Integrated relational databases and implemented efficient CRUD operations.

Collaborated in designing scalable application architecture and deployment workflows.

Data Analyst Intern (Virtual Internship)

Deloitte Australia

Dec 2025

Remote

Performed exploratory data analysis (EDA) on HR datasets to identify workforce trends.

Cleaned and transformed structured datasets improving reporting accuracy.

Built dashboards and visualizations supporting HR decision-making.

Delivered actionable insights through statistical analysis.

PROJECTS

Emergency Call Volume Prediction and Surge Detection

Regression Modeling & Deployment

2026

Python, Scikit-learn, Docker, Render

Developed Random Forest regression model to predict emergency call volumes achieving R2 score of 0.80 and MAE of 3.24.

Performed feature engineering, model validation, cross-validation, and hyperparameter tuning.

Containerized the ML application using Docker and deployed publicly for real-time inference.

GitHub: [View Repository](#)

Stroke Prediction System

Healthcare ML Classification

2026

Python, Scikit-learn, Flask, Render

Built end-to-end classification model to predict stroke risk using healthcare datasets.
Handled preprocessing including encoding, scaling, and class imbalance techniques.
Evaluated model performance using accuracy, precision, recall, and F1-score metrics.
GitHub: [View Repository](#)

Sentiment Analysis System (NLP Pipeline)
Natural Language Processing & Deployment

2026
Python, TF-IDF, Logistic Regression, Docker, Render

Built scalable NLP pipeline using TF-IDF (10,000 features) trained on 100,000+ text samples for sentiment classification.
Implemented Logistic Regression classifier with model validation and evaluation metrics.
Dockerized and deployed the application for scalable cloud-based inference.

EDUCATION

Nadimpalli Satyanarayana Raju Institute of Technology <i>B.Tech in Computer Science and Engineering, CGPA: 8.30</i>	Visakhapatnam 2021 – 2025
NRI Junior College <i>Intermediate, Marks: 850</i>	Visakhapatnam 2019 – 2021
Z.P.H.S <i>SSC, CGPA: 9.0</i>	Visakhapatnam 2018 – 2019

CERTIFICATIONS

- Python Programming** – Cisco
- Prompt Engineering** – Udemy
- SQL** – GeeksforGeeks
- LangChain for LLM Application Development** – LangChain Academy

ACHIEVEMENTS

- Developed and deployed production business website** – [vizagcarpenter.in](#) handling service listings and customer inquiries.
- First Prize – V Cube Hackathon** – Built end-to-end ML application for Emergency Call Prediction (Feb 2026).
