SUMMARY

Aspiring AI/ML Engineer with strong hands-on experience in Machine Learning, NLP, and full-stack development. Skilled in building end-to-end ML pipelines including data preprocessing, feature engineering, model validation, cross-validation, hyperparameter tuning, Docker containerization, and cloud deployment. Hackathon winner with proven ability to design and deploy scalable AI-driven applications in fast-paced environments.

TECHNICAL SKILLS

Programming: Python, SQL

Machine Learning: Supervised & Unsupervised Learning, Regression, Classification, Feature Engineering, Model Validation, Cross-Validation, Hyperparameter Tuning, Scikit-learn

Natural Language Processing: TF-IDF, Logistic Regression, NLTK, Hugging Face Transformers

Generative AI & LLMs: LangChain, OpenAI API, Ollama, Retrieval-Augmented Generation (RAG), Prompt Engineering

MLOps & Deployment: Docker, REST APIs, Flask, FastAPI, Streamlit

Data Analysis & Visualization: Pandas, NumPy, EDA, Matplotlib, Seaborn, Power BI

Databases & Tools: MySQL, Git, Jupyter Notebook, VS Code, Google Colab

EXPERIENCE

Full Stack Developer Intern

July 2024 – Dec 2024

Demy Software Solutions

Visakhapatnam

Developed and maintained dynamic full-stack web applications integrating frontend and backend systems.

Built optimized REST APIs and improved API response time by approximately 25%.

Integrated relational databases and implemented efficient CRUD operations.

Collaborated in designing scalable application architecture and deployment workflows.

Data Analyst Intern (Virtual Internship)

Dec 2025

Deloitte Australia

Remote

Performed exploratory data analysis (EDA) on HR datasets to identify workforce trends.

Cleaned and transformed structured datasets improving reporting accuracy.

Built dashboards and visualizations supporting HR decision-making.

Delivered actionable insights through statistical analysis.

PROJECTS

Emergency Call Volume Prediction and Surge Detection

2026

Regression Modeling & Deployment

Python, Scikit-learn, Docker, Render

Developed Random Forest regression model achieving R2 Score of 0.80 and MAE of 3.24.

Performed feature engineering, model validation, cross-validation, and hyperparameter tuning.

Containerized the application using Docker and deployed publicly for real-time inference.

GitHub: [View Repository](#)

Stroke Prediction System

2026

Healthcare ML Classification

Python, Scikit-learn, Flask, Render

Built end-to-end classification model to predict stroke risk using healthcare datasets.

Handled preprocessing including encoding, scaling, and class imbalance techniques.

Evaluated using accuracy, precision, recall, and F1-score metrics.

GitHub: [View Repository](#)

Sentiment Analysis System (NLP Pipeline)

2026

Natural Language Processing & Deployment

Python, TF-IDF, Logistic Regression, Docker, Render

Built NLP pipeline using TF-IDF (10,000 features) on 100,000+ samples.

Implemented Logistic Regression classifier with model validation and evaluation metrics.

Dockerized and deployed publicly for scalable cloud-based inference.

EDUCATION

Nadimpalli Satyanarayana Raju Institute of Technology

Visakhapatnam

B.Tech in Computer Science and Engineering, CGPA: 8.30

2021 – 2025

NRI Junior College

Visakhapatnam

Intermediate, Marks: 850

2019 – 2021

Z.P.H.S

Visakhapatnam

SSC, CGPA: 9.0

2018 – 2019

CERTIFICATIONS

Python Programming – Cisco

Prompt Engineering – Udemy

SQL – GeeksforGeeks

LangChain for LLM Application Development – LangChain Academy

ACHIEVEMENTS

Developed and Deployed Business Website – vizagcarpenter.in (Feb 2026).

First Prize – V Cube Hackathon – Built end-to-end ML application for Emergency Call Prediction (Feb 2026).
